AMES WATER TREATMENT PLANT
ATTN: DEAN SAYRE
515 CLARK AVE
AMES, IA 50010

Subject: 2023 Supplement Specifications to SUDAS Approval Letter
PWSID No. IA8503039 - Project No. W2023-0380
Permit No.

Dear Mr. Sayre:

We have completed our review of the 2023 Supplemental Specifications to the Iowa Statewide Urban Design and Specifications (SUDAS) and determined these standard specifications for water mains are in accordance with our current rules. Therefore, these specifications are **approved** for use for future projects relating to water main construction submitted for Ames.

When making submittals for water main projects, the engineer must state on the plans and appropriate DNR schedule that the construction shall be in accordance with the approved standard specifications currently on file with this Department. If there are any deviations in the specifications as they apply to a particular project, such deviations can be covered through additional provisions and must be submitted with the project.

Our review of these specifications has considered only material standards and installation methods as outlined by the requirements of this Department. Any major changes in current policies may require the updating of these specifications.

If you have any questions, please contact Anna Seeger via e-mail at anna.seeger@dnr.iowa.gov or by telephone at 515-725-0227.

Sincerely,

Anna Seeger
Environmental Engineer
Water Supply Engineering
