

Rain Garden Cost Share Program

The city of Ames is implementing a Smart Watershed Program to increase local awareness of the importance of protecting our local streams and lakes. It is promoting methods to capture and infiltrate storm water in residential areas. Rain Gardens can be used in residential yards to capture and infiltrate stormwater if the soils drain properly. These gardens reduce the amount of nutrients and other pollutants entering local streams.

What is a Rain Garden?

A rain garden is a garden that captures rain from roofs, driveways and yards and is planted in native and/or horticultural flowers. It is a depression or shallow bowl built in the landscape, is level from side to side and end to end and is filled with amended soil and plants. Runoff that travels to a rain garden temporarily ponds, and then infiltrates into the soil in 2 days or less. Capturing runoff in a rain garden allows water to infiltrate into the soil rather than run into streets and storm drains. Dirty runoff that enters storm drains is sent directly to your neighborhood streams, lakes or wetlands.

Can I put a Rain Garden in My Yard?

Almost anyone that has adequate drainage in the soils in their yard could have a rain garden if the area is available along with other factors. A simple soil test must first be performed in the area being considered for a rain garden. If the soil has adequate percolation rates then a rain garden can be installed. If the soils are too clayey they may not have good percolation and therefore you would not want to install a rain garden but rather consider other stormwater best management practices such as doing soil quality restoration in your yard and/or install a rain barrel.

Want to Learn More About The Rain Garden Rebate Program?

The City of Ames is offering a rebate of up to \$500 for the installation of residential rain gardens within city limits. To qualify one must the following steps:

Rain Garden Rebate Program Steps

1. Identify flat areas of your yard down slope of roof drain downspouts where gardens can be installed.
2. Contact Iowa One Call 1-800-292-8989 to have your yard flagged for utilities in these flat areas.
3. Conduct a simple soil test: percolation test and ribbon test according to the Iowa Rain Garden Design and Installation Manual
4. **If the soils don't adequately drain** then don't install a rain garden in your yard. Consider soil quality restoration and/or planting native plants in your flower gardens.
5. **If the soils adequately drain** for a rain garden then proceed with the application process.
6. Complete an application and return to the Public Works Department.
7. The Public Works Department will review the application and notify you when the application has been approved and you can proceed with construction of your rain garden.
8. Install a rain garden according to the Iowa Rain Garden Design and Installation Manual
9. **The Ames Rain Garden Rebate can be used towards the purchase of the following:**
 - a. Plants (at least 50% of the plants need to be native to Iowa)
 - b. Amended soil (50% sand, 30% compost, 20% yard topsoil-low clay content or purchase topsoil). This can be mixed by yourself onsite or delivered to your site by a local supplier. It is required to use a minimum of 6 inches of amended soil in the rain garden.
 - c. Downspout extension to rain garden and/or non-perforated plastic drainage pipe that would be attached to the downspout and directed to the rain garden
 - d. Edging (such as pavers, plastic, metal, or rocks)
 - e. Rental of a rototiller and/or sod cutter
10. To get your rebate, provide a picture of the completed rain garden and receipts for the purchase materials and equipment rental to the Public Works Department.
11. A check will then be mailed to you.

RAIN GARDEN REBATE APPLICATION FORM

All information must be completed to avoid claim denial or processing delays.
IMPORTANT: Please read the attached "Terms and Conditions" before completing this form.
